Digital Signal Processor

Product Specifications

Digital Signal Processor	HT-ADS-900C
Input & Output	All 12 output ports support output gain -100 to 20dBu, All input ports support 48VDC phantom power and input gain -10 to 50 dB
Other Ports	Automatic gain sharing and microphone mixing for flexibility and smoother transitions in varied environments, Input and output ports support EMI filter, Ethernet port (remote monitoring, management and configuration), RS-232 port for 3rd party controllers
Echo cancellation	20Hz to 22KHz of bandwidth 8 or more mic / line in with monaural and full stereo acoustic echo cancellation
Signal to Noise Ratio	Enhance Signal to noise ratio without background hassle with Automatic Gain control
