## Wooden Podium

### Specifications:

Wooden Podium	HT-WP-20
Demission	700mm(W) X 625mm (D) X 1200mm (H)
Construction	Made from pre-laminated particle board 25 mm thick with an edge banding of 2 mm thickness on visible sides and 18 mm thick on the rest. Designed with both sides of podium having curved shapes, and front panel with four 50mm corner radiuses, and one open shelf, vertical cable risers are provided below the table top for power connection, made of 18mm thick pre-laminated particle board. There are buffers at the base to prevent scratches on the floor. Two openable hinged shutters at the bottom store electronics. A front panel with a thickness of 06mm and fittings is made of clear glass. Gromet is provided at top for wire management..
